

## Comfort Mattress Range

Your mattress plays an important role in your life—more so than you might realise with up to 80% of Australians experiencing back pain at some point in life. It affects your body and your sleep, which in turn, impacts your health, your mood, your productivity at work, your relationship, and more. Your spine is your body's central support structure. The spine has three gentle curves that make an S-shape. These curves help your spine absorb shock, support your head, and keep your body stable. It connects different parts of your musculoskeletal system which assists you to sit, stand, walk, twist and bend.

Sleeping on a mattress not suited to your spine structure, or an old worn mattress can cause back pain along with sleepless nights. Having the correct supportive mattress and an adjustable bed can ease and/or eliminate your back pain, allowing you to have a blissful night's sleep, and a happier day. As all our comfort mattresses are Australian made, we can offer custom sizing in our entire range without the long wait for delivery!

### Liberty Pocket Spring Comfort Mattress

- **Bamboo Fabric Top** – Super soft and highly absorbent, thermoregulating Eco-Friendly fibre.
- **Premium Hyper Soft/Fibre Quilt** - Premium Foams and Fibres to ensure durability, comfort, and support. This will enable a long-lasting quality sleep.
- **Luxury Foam Comfort Layer** – The Foam core creates maximum sleep-inducing effect with comfort and support.
- **Gel Infused Visco Memory Foam** – Visco Memory Foam is a durable comfort layer with slower moving response and has Pressure Relieving Properties, Gel infused allows for a cooler sleep.
- **5 Zone Pocket Spring System with Foam Box Construction** - Pocket spring units consist of a group of tempered steel coils that

have been individually inserted and sealed into a durable material pocket or sock. Each pocket is then fused to its neighbour until a large rectangle of pocketed springs results. This mattress has 5 main zones, which offers variable support for the main areas of your body, providing superior alignment and pressure relief where you need it. Different zones are designated for the head, shoulders, lower back, thighs, and feet.

- **Foam Box Construction** - has been designed to give improved edge support and enables the person to sleep closer to the edge on the mattress giving more surface area to sleep.
- **SWL** – 120 kilos
- **Mattress Depth** – 280mm

### Liberty Pocket Spring 'Cool' Comfort Mattress

- **Cool Touch Fabric** – Provides an instant cooling effect to the skin and is soft as silk
- **Premium Hyper Soft/Fibre Quilt** - Premium Foams and Fibres to ensure durability, comfort, and support. This will enable a long-lasting quality sleep.
- **Cool Gel Layer** – The Gel Layer uses Conduction to transition heat out of the body and into the overlay. The result is the body will feel cooler as heat is transferred naturally. The mattress will eventually reach body temperature as the product is not powered electrically but the cooling effect can begin once again as soon as the user moves position slightly. Dissipation of heat will occur naturally during the night.

- **Premium Convolute Comfort Layer** – comfort layer of convoluted low-density foam to provide exceptional comfort that supports the body's natural pressure points while increasing neck, back, and shoulder comfort levels.
- **Luxury Foam Comfort Layer** – The Foam core creates maximum sleep-inducing effect with comfort and support.
- **5 Zone Pocket Spring System with Foam Box Construction** - Pocket spring units consist of a group of tempered steel coils that have been individually inserted and sealed into a durable material pocket or sock. Each pocket is then fused to its neighbour until a large rectangle of pocketed springs results. This mattress has 5 main zones, which offers variable support for the main areas of your body, providing superior alignment and pressure relief where you need it. Different zones are designated for the head, shoulders, lower back, thighs, and feet.
- **Foam Box Construction** - has been designed to give improved edge support and enables the person to sleep closer to the edge on the mattress giving more surface area to sleep.
- **SWL** – 120 kilos
- **Mattress Depth** – 300mm

### Liberty Full Latex Core Mattress

- **Bamboo Fabric Top** – Highly absorbent and thermoregulating and is an Eco-Friendly fibre.
- **Premium Foam & Fibre** – Premium foams and fibres
- **Full Core Latex** - Full Natural Latex is a durable, springy material that recovers its shape very quickly after weight is lifted. Latex benefits the lumbar lordosis in the correct posture, preventing the unnatural compression of discs.
- **SWL** – 160 Kilos
- **Mattress Depth** – 220mm

### Liberty Bariatric Comfort Mattress

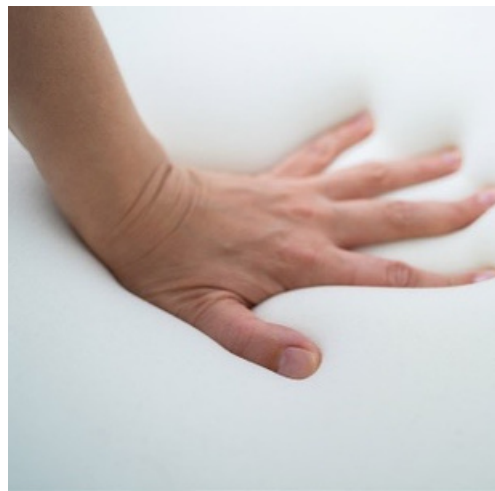

- **Bamboo Fabric Top** – Highly absorbent and thermoregulating and is an Eco-Friendly fibre.
- **Gel Infused Visco Comfort Layer** - Visco Memory Foam is a durable comfort layer with slower moving response and has Pressure Relieving Properties, Gel infused allows for a cooler sleep.
- **Foam Core** – Gives maximum support and comfort with minimal motion transfer.
- **Internal Support Foam Layer** – Strong support foundation foam.
- **Base Support Layer** – Offering extra firm support.
- **Side Support Foams** – Giving additional support and prevents the sides of the mattress from compressing when sitting on the side of the bed.
- **SWL** – 250 Kilos
- **Mattress Depth** – 250mm

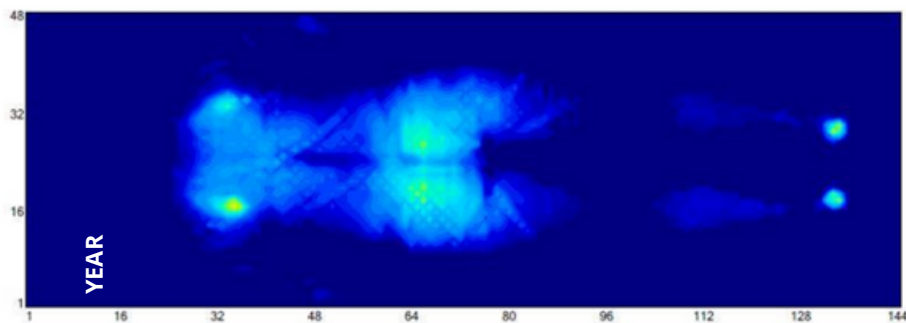

### Memory Topper

Our Memory Toppers are Australian made with Visco memory foam. The elastic properties allow the material to **contour precisely to the shape of your body**, cradling you in your natural sleeping position for comfort that lasts through the night.

- **Superior Breathability** - Enhanced heat releasing properties and reduced moisture absorption, providing a cooler surface.
- **Anti-Microbial** treated, fresher for longer.
- **Faster Recovery** – This Visco foam recovers 80 percent faster when compressed compared to comparable grades, making it more durable and effective in retaining its shape, without compromising on comfort.
- **Advanced Comfort & Pressure Redistribution** - Next Generation Visco grades have been clinically tested with pressure mapping to Class 1 medical device standards.
- **Bamboo Fabric Cover** which is a thermoregulating Eco-Friendly fibre.
