

# LIBERTY HEALTHCARE

COMFORT - MOBILITY - INDEPENDENCE

## Liberty Companion Bed Range

*Liberty Healthcare* **Manufactures both Non-Electric/Flat Companion Beds & Adjustable Companion Beds in Australia**, to suit the individual situation and desired goals of its customers. Our Companion range is designed with users and their partners in mind. The companion range creates flexibility and comfort for users wishing to sleep next to their partner. We offer a choice in our split bed range – sizing will depend on the available space in your bedroom and our Equipment Specialist can advise what options are available to best suit your bedroom, considering your requirements and other equipment that you also may require in your bedroom.

### Companion Bed Compatibility – Flat non-electric OR an Adjustable bed

We offer **non-electric companion beds** manufactured with the same quality steel frame, padded platform base, and sturdy lockable castors. All our split-bed designs are scripted to be at the same height (from floor to top of mattress) even if the beds have different functionality. When we manufacture our Split-Beds we also take into consideration any differences in depths of mattresses required by the end user and their partner. We also offer **Adjustable beds** for your Partner, and this can be either our Homecare with head and leg elevations or a fully functional Hilo with head and leg elevations.

### Bed Frame and Base Platform

Our bed frame is constructed entirely in **Quality Steel** and the base platform is padded with optional depths of 25mm/50mm/100mm foam - Our Equipment Specialist will script so that your beds are at the same height.

### Variable Lockable Castor Options

Liberty Healthcare beds are supported by **Superior Grade**, non-marking, high shock absorption lockable castors. These are available in the following sizes: 50mm/75mm/100mm/125mm also providing the option of feet for those not requiring the bed to move or benefit from the lowest possible bed height in its resting position. Companion beds are not attached, and once castors are locked your beds will stay together and ensure minimal gapping between them.

### Standard Bed Sizes Available for Homecare/Hilo Range
